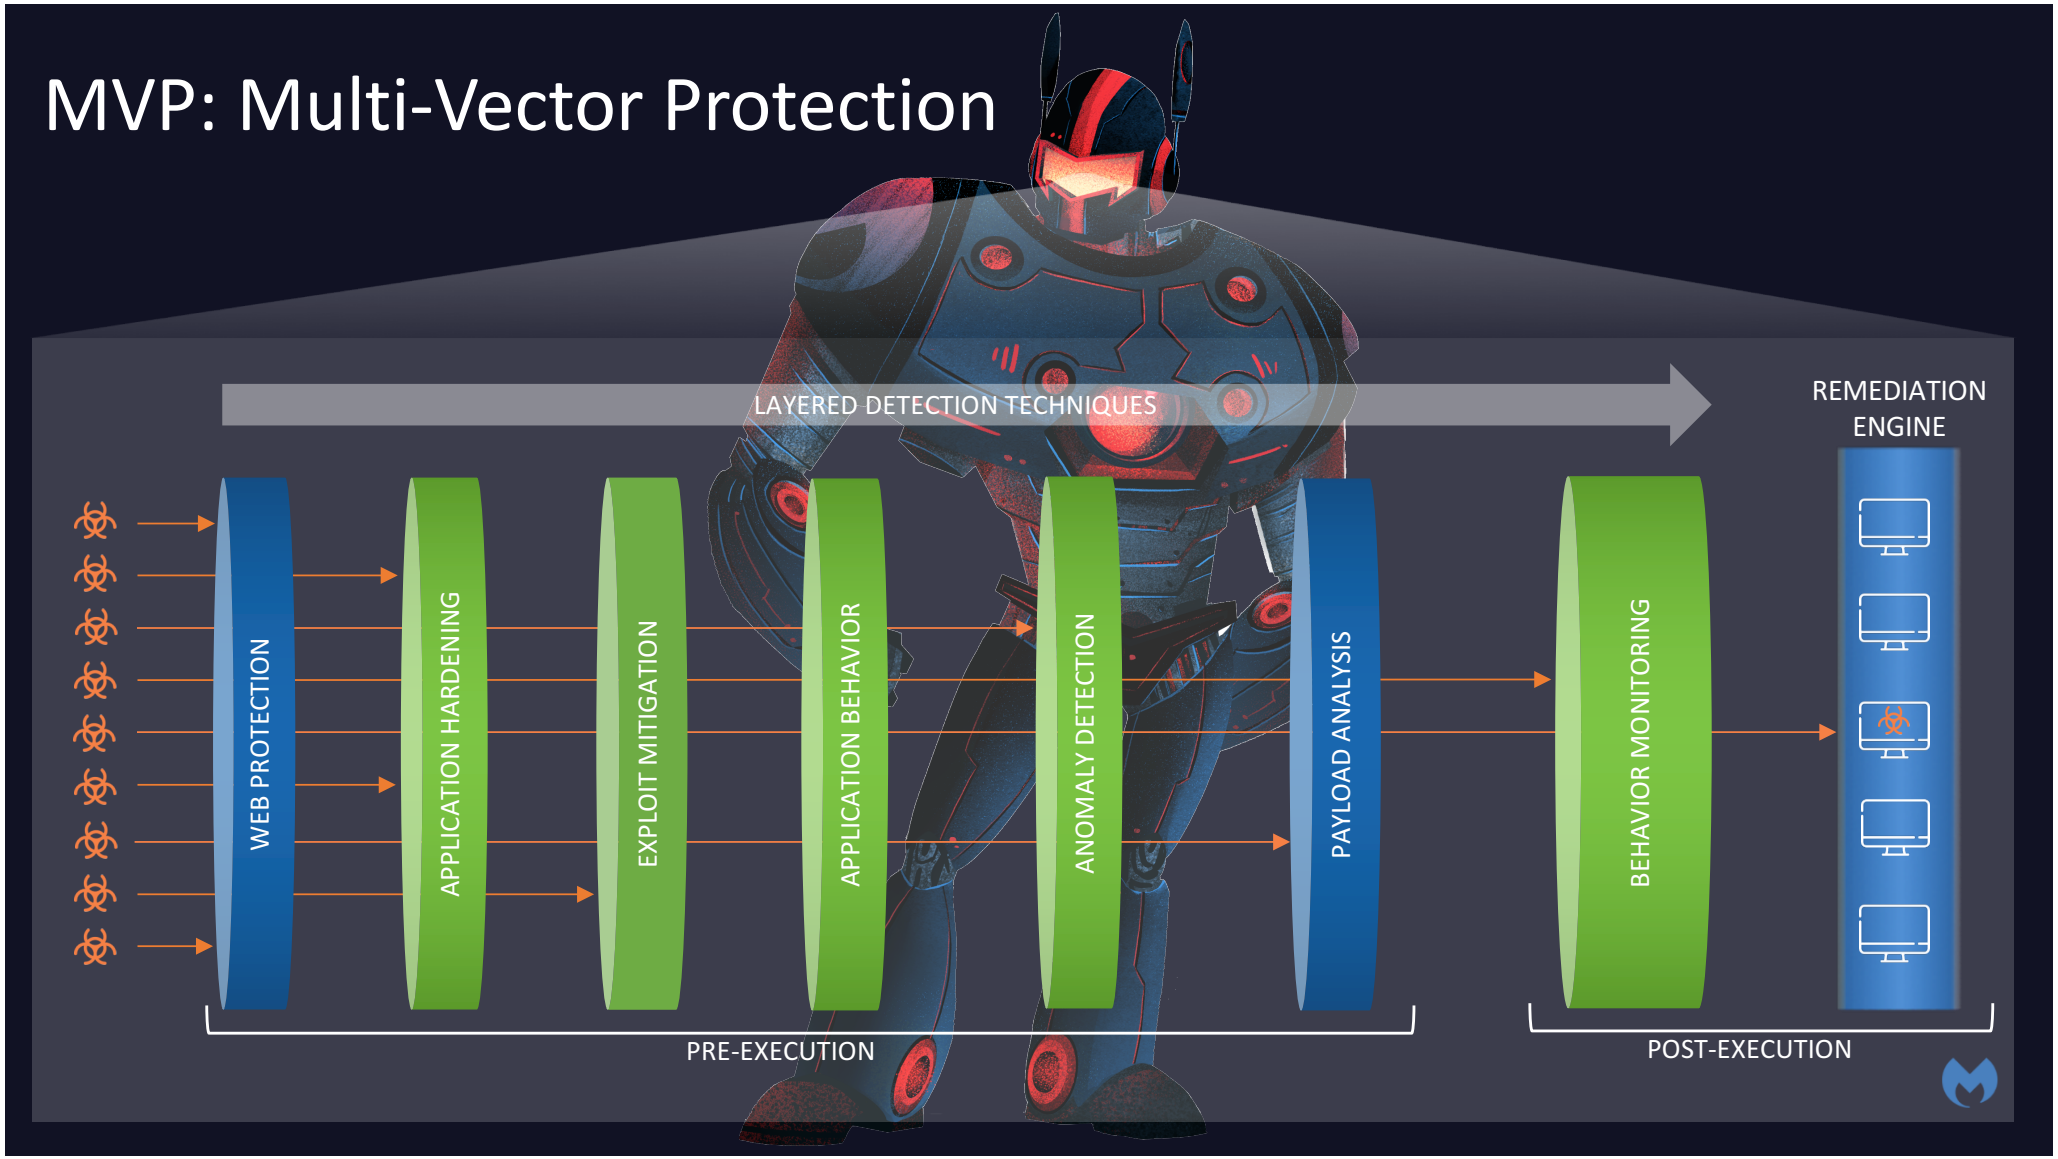
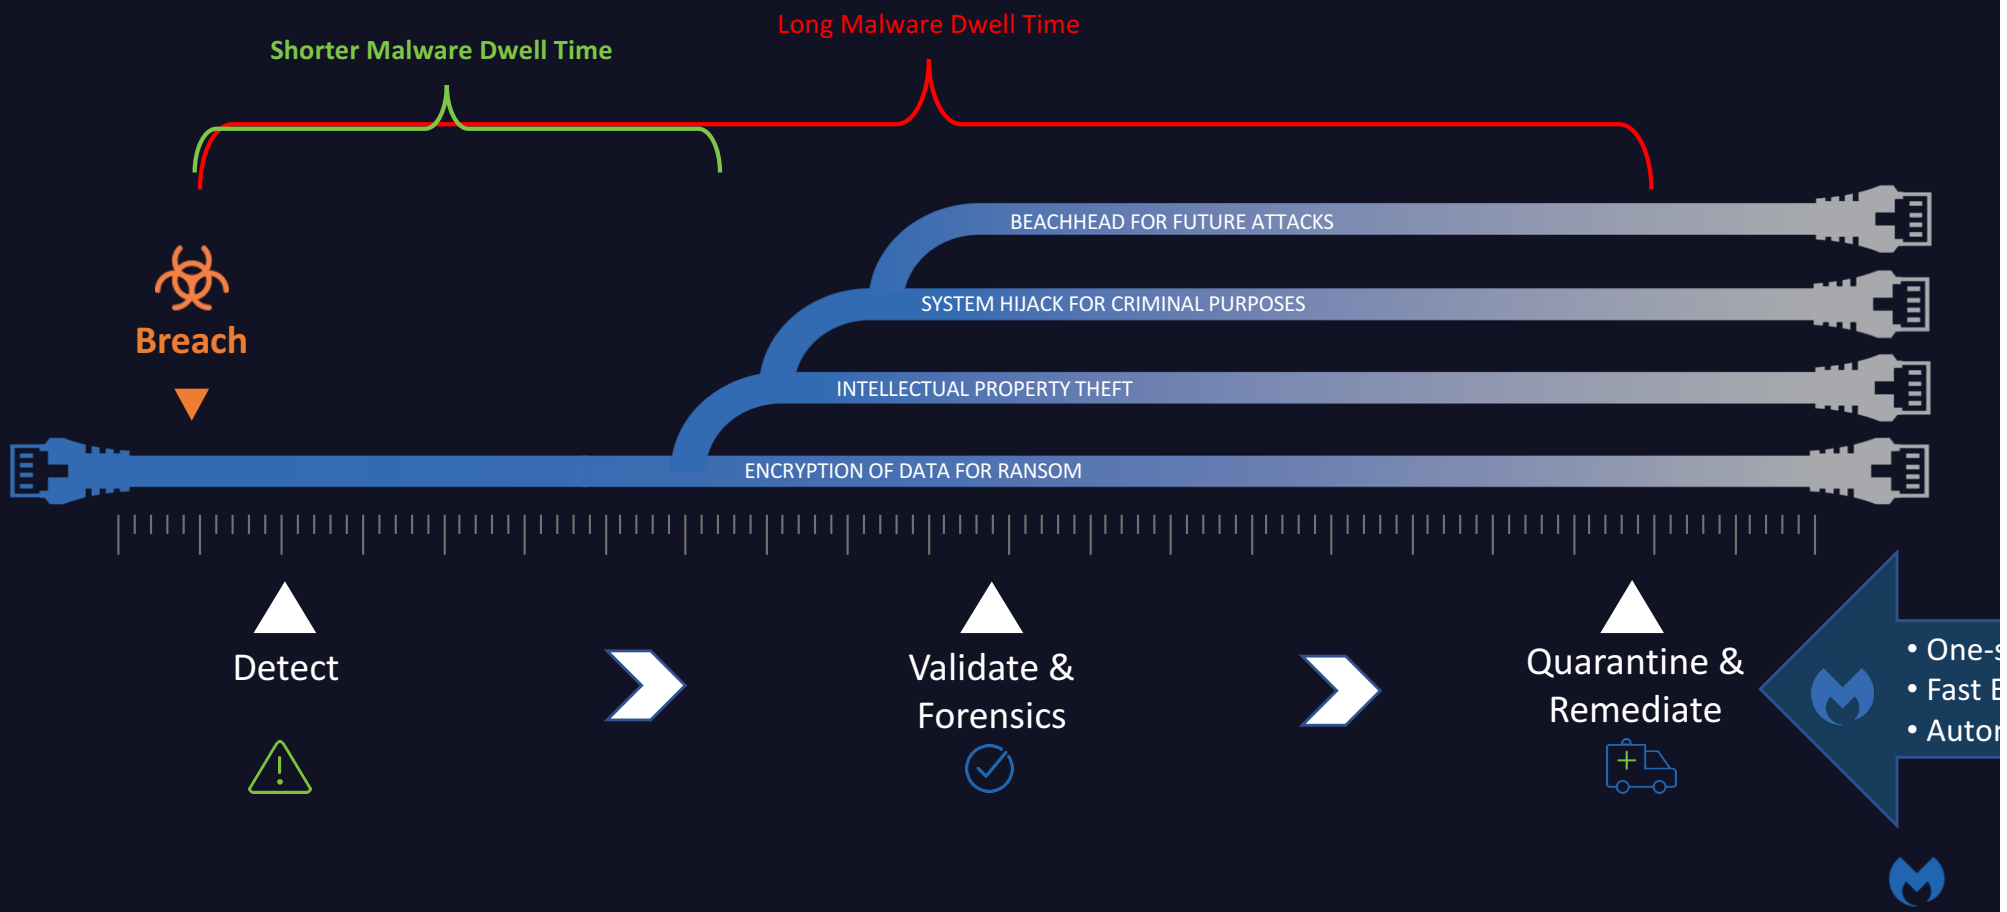
Big Data Analysis

The standard for Remediation — *Do you know Malwarebytes?*

MVP: Multi-Vector Protection



Incident Response with Malwarebytes



Malwarebytes Cloud Solutions

ENDPOINT PROTECTION

Multi-vector protection against ransomware, malware, and zero-day exploits

Unifies multiple layers of signature-less technologies to detect and stop a cyberattack before damage occurs

- Proactively protect against advanced threats
- Block attackers at every stage of the attack chain
- Identify unknown files via Anomaly Detection engine

INCIDENT RESPONSE

Removes malware, PUPs, and adware

Provides complete and thorough threat remediation, driven by our proprietary Linking Engine

- Remediate malware from the endpoint
- Cut dwell time of threats, reducing damage
- Reduce exposure by proactively hunting for threats
