Trump murders beloved koi by overfeeding. It's not a Las Vegas buffet, you moron. They suffocate on the extra food!

Jennifer Jacobs @JenniferJJacobs

Trump spoon feeds koi fish at Akasaka Palace. He ended up just dumping the whole box of fish food into the pond, per @justinsink at scene.

Theoretical background

Black is White: Experiments on Suggestion

Two fragments from 1971 documentary directed by Felix Sobolev. The psychological experiments were conducted by Dr. Valeria Mukhina.

A Criminal Scientist ([view the video](#))

Different people are shown the same portrait. Some are told that this is a famous scientist, others - that this is a dangerous criminal (the true profession of the photographed man is an actor). In every case they are asked to describe his character based on the photo. Here is what people say depending on the suggestion

A Scientist

- His eyes are squinted kindly
- A penetrating gaze, like an X-ray.
- He should like kids
- When he talks to people he can make them like him

A Criminal

- His eyes are impudently squinted
- Inhuman gaze
- He is a sadist
- He is dissatisfied with people and despises them

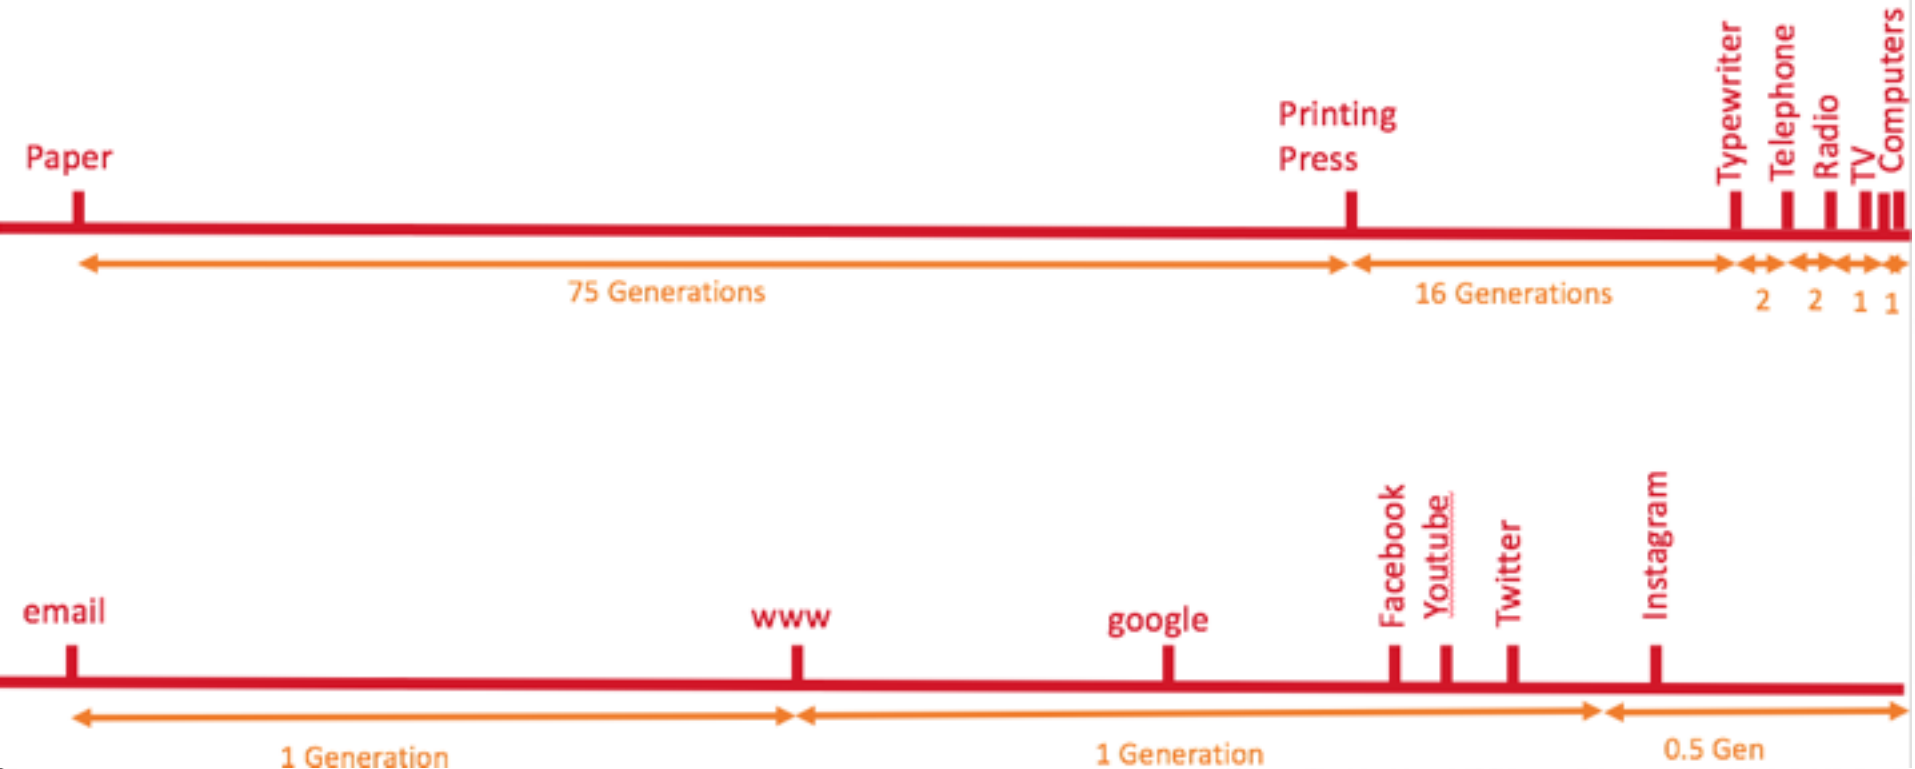

In a related experiment [an actor was presented to a highly educated audience as a great scientist](#). He went on to read a lecture, which was a complete nonsense. Nobody noticed anything wrong.

With a lack of information, we unwillingly find that others expect from us according to the intros

Things that worked well ...

Both WHITE!?!? - Yes!

Black is white ([view the video](#))

A group of seven people are shown two pyramids one black and one white. The experimenter asks each member of the group what color are the pyramids. Six members of the group are experimenter's accomplices (like in Asch's experiment) and say that both pyramids are white. Some test subjects yield to group suggestion and also says that both are white. In another experiment the group is shown five photos of five different people. Experimenter asks the members of the group if among these photos are portraits of the same person. Experimenter's accomplices are instructed to say that certain two photos show the same person and to find common facial features to convince the test subject. Often they succeed. One test subject explains why he was taken in

I felt embarrassed before my comrades. Because they were so knowledgeable, could emphasize things so competently, could notice every small detail, compare and link everything together.

Could it be that the high status of the masterpieces of modern art is not challenged because people feel embarrassed before the knowledgeable art critics who can emphasize things so competently, can notice every small detail, compare and link everything together? Could the same be true for modern literature and poetry? Check out the [Reverent Quizzes](#) to see if you can tell the work of a recognized genius when his name is separated from it, that is when you are free from suggestion.

BandWagon Effect

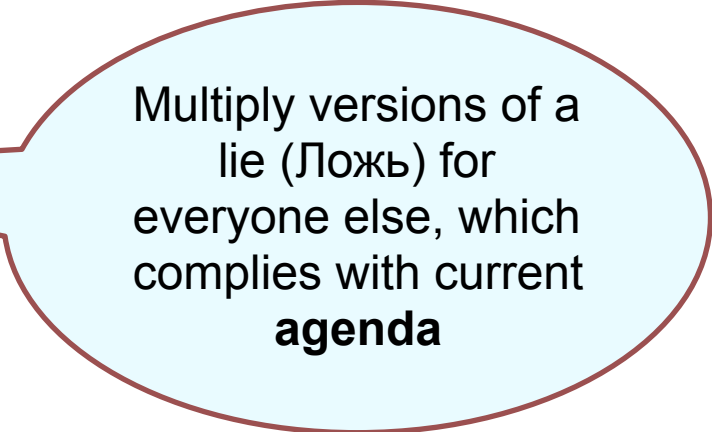

As more people come to believe in something, others also "hop on the bandwagon" regardless of the underlying evidence.

Polls says yes, and you see NO re-elections. Why

The **spiral of silence theory** is a political science and mass communication theory proposed by the German political scientist Elisabeth Noelle-Neumann, which **stipulates that individuals have a fear of isolation**, which results from the idea that **a social group or the society in general might isolate, neglect, or exclude members due to the members' opinions**. This fear of isolation consequently leads to remaining silent instead of voicing opinions. Media is an important factor that relates to both the dominant idea and people's perception of the dominant idea.

The current process of “FN”
is mostly about applying old
theories to modern means of
communication

МАТЕРИЯ	Что первично?	СОЗНАНИЕ
НАУКА	Кто прав?	РЕЛИГИЯ
СОЦИАЛИЗМ	Какой строй лучше?	КАПИТАЛИЗМ
ПЛАНОВАЯ	Какая экономика лучше?	РЫНОЧНАЯ

И ТАК ДАЛЕКЕ ...

Fake news is just a top of the Iceberg

What “customers” can do on YouTube

Выход в ТОП от 5 видео

Цена: 450000.00руб.

Регистр: Россия

Гарантия: 0 (пробный)

Минимальная цена: 20 (с 1000000.00руб.)

Длительность видео: До 8 минут

Описание услуги:

Мы предоставляем услугу выхода видео в любые подтопы на Главную Страницу YouTube. Цена зависит от видео длительности более 2 минут. Цена на ролики длительностью менее 2 минут + комиссия (подробности уточняйте в поддержке сервиса).

Выход в ТОП + на Главную страницу YouTube, возможен на все страны из общего числа подписчиков просмотров 2 миллиона 0 (пробный) - Россия - Главный ТОП России - На данный топ подписано более 2,4 МВН Подписчиков.

В среднем видео ролик популярный на главную страницу набирает от 200-300 просмотров до 1 миллиона просмотров. Не существует подобных методов рекламы которые могут гарантировать эффективный результат выхода видео в ТОП на Главную. Вы можете выйти в ТОП (зависит от качества видео) и получить дополнительные лайки и любые комментарии но в том же контенте + вы его не будете считать за выполненный заказ. Данная услуга видео будет только тем видео + которое попадет на Главную в тренды.

Плюсы от выхода:

1. Ваше видео начнет активно получать комментарии, лайки, подписчики на ТОПы
2. 100% Гарантия Выхода на в ТОП
3. Вероятность обзвонки + все рекламодатель возрастет в разы
4. Сила числа до миллиона лайков видео видео
5. Быстрый старт для развития вашего проекта
6. Получившийся подписчики на ваш канал.

Условия выхода:

1. Пополните ваш баланс на необходимый сервис
2. Сопоставьте 6 (шестидесяти)
3. Промоформировать услугу продвижения видео видео будет доступно на канал
4. Ролик должен быть видео загруженный и не старше 1 часа
5. Ролик выводится за 6-30 часов
6. Ролик может продвигаться в ТОП от 10 часов до 3 дней
7. 8 июля ролик может набрать от 200,000 до 1 млн. просмотров, в том же контенте по промокоду канал ваш видео не будет пропускаться в топикан и видео.

Многие пользователи нашего сервиса стали активными на весь мир через сервис YouTube, крупнейший канал YouTube - Channel - YouTube. На данный момент, мы предлагаем вам сервис продвижения и видео видео.

What we expect from Normal Accounts vs Bots?

- (1-Norm) \approx Anomaly
- Now it doesn't work, there is no such line, it's kind of fuzzy

Bots is a buzzword but what about real people?

blackhat/mazdelena_botok_j_bvix_judey

Главная Сайт + API Новости Инфа Боты **new** Контакты Соглашение пользователя Быстрый заказ

Мы разделили накрутку ботов и живых людей

Не один из существующих сервисов не говорит Вам правду. А правда заключается в том, что все накручивает ботов и живых людей вместе взятых. Вы заходите на сайт, выполняете задание со своей старницей, а вместе с Вами задания выполняют еще множество ботов.

Кто такие боты

Вообще, понятие боты - довольно широкое. Здесь мы расскажем, что именно подразумевается под понятием боты в смысле накрутки. Итак, боты - это либо неживые страницы/специально зарегистрированные страницы в социальной сети с минимумом введенной информации, либо взломанные аккаунты живых людей.

Какие проблемы возникают при накрутке ботов

При накрутке ботов возникает целый ряд проблем. Итак:

1. **Боты часто становятся "собачками".**
То есть ВКонтакте их блокирует за поддельную активность, они превращаются в "собак", это становится заметно и выигрывает конкурс, ради которого Вы и решили **накрутить лайки ВКонтакте**, становится проблематичным.
2. **Боты выходят из групп.**
Боты, если это взломанные аккаунты, восстанавливают доступ к своей странице. И после этого выходят из всех групп, куда вступали через сайт. С этим тоже проблема - заказчики просто теряют деньги на этом.
3. **ВКонтакте отписывает ботов из групп.**
Когда осуществляется **накрутка подписчиков ВКонтакте** ботами, то используется специальное программное обеспечение. ВКонтакте отслеживает накрутку через такое ПО и отписывает из групп всех накрученных(а иногда и намного больше) людей.
4. **Боты не проявляют активность.**
Даже при **накрутке подписчиков Instagram** ботами могут использоваться боты. Как правило, это автоматически зарегистрированные аккаунты, так называемые мертвые души. Они будут просто висеть у вас в подписчиках для количества, но проявить какой-либо активности они не будут.

Кого мне накручивать - ботов или живых людей?

Тут выбор за Вами. У каждого подхода свои плюсы и свои минусы. Давайте их рассмотрим:

Накрутка ботов	Накрутка живых людей
➔ Дешевле	➔ Высокое качество

Могут набирать голоса фактически в любых интернет голосованиях. Занимаюсь этим с 2014 года с небольшими перерывами, опыта достаточно.

Могут накручивать конкурсы где голоса учитывается через: IP, капчу, авторизацию соц. сетей, регистрацию, регистрацию с подтверждением почты, sms подтверждение и многое другое.

Насчет гарантий: По запросу могу сделать проверочную накрутку 10-20 голосов, далее оплата по частям начиная от 50 голосов.

REQUEST

Name - Price

Price

Prices

What is the price for reputation? What does it mean a reputation? (In Latin, reputatio: account, numbered).

Even in this word we can understand the importance and relevance to the purity of company or person!

How much is the price for the name for the company? What is the price for your social status...?

Price is formed by the removal of comments posted in: blogs, chat rooms, forums and other sites, the weight of the site also plays an important role.

For example:

One link from one to three commentaries will cost - 100\$. If site does not include certain difficulties during removal.

But if 50 news websites write about the adventures of Oleg Bender, price for removal will be as it was in the movie.

First of all, decide for yourself how much you need it.

Price for service "Creating a positive image of the company" is calculated for each client individually.

China accused of Sars cover-up

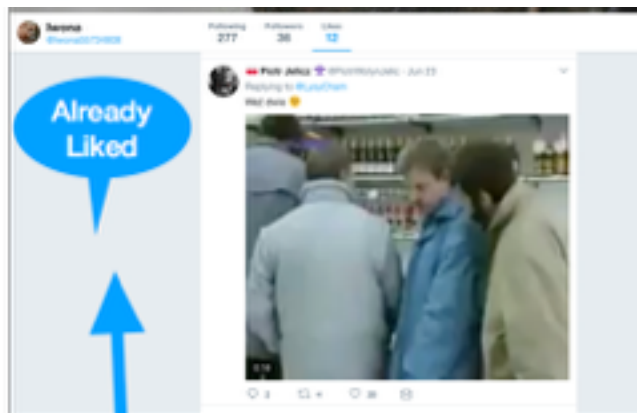

6

Staff and agencies

Wednesday 9 April 2003 17:18 BST

A senior Chinese doctor today accused his government of covering up details about the spread of severe acute respiratory syndrome (Sars), while a Beijing hospital was shut down, reportedly because medical staff became infected. Even as state media repeated the government's claim that the outbreak is under control, the health ministry said officials from throughout [China](#) had been summoned to Beijing to discuss efforts to counteract Sars.

Russian Media Watchdog Threatens To Ban Facebook Over 'Legal High' Ads

Mar Simola • September 17, 2013, 5:31 pm

Facebook says adverts for smoking blends were the result of a technical glitch

The Russian Federal Service for Supervision of Communications, Information Technology and Mass Media (Roskomnadzor) has threatened Facebook with a blanket ban over claims the social network has advertised smoking blends designed to replicate the effects of cannabis.

According to *Russia Today*, the government agency has launched an investigation and said it would be willing to go as far as instructing ISPs to block Facebook across the country, if it finds proof of criminal activity.

In the UK, 'legal high' is used as a colloquial term to describe substances which can cause effects similar to those of illegal drugs, but not covered by the British misuse of drugs laws. Smoking blends that fit into this category usually contain extracts of *Salvia divinorum*, Hawaiian Wood Rose or Blue Lotus - all freely available in the UK, but banned in Russia since 2010.

In Russia, herb burns you!

The incident began after several users reported certain Facebook ads were advertising illegal products, and leading to online stores delivering those products across Russia and Ukraine.

"If we find violations in the advertising law, then we will open up an investigation. In case narcotics are involved, then we will forward all the materials to the Federal Service for Drug Control," Andrey Kashevarov, deputy head of Roskomnadzor told *Iar-Tass*.

Roskomnadzor is the agency which was recently given powers to 'blacklist' internet resources, even before the issue of a court order.

"If Facebook does not respond then [the media

ФАС грозит заблокировать Facebook из-за рекламы курительных смесей

14:20, 16.09.2013 // Росбалт, Главные новости

Federal antimonopoly service threaten to block Facebook, due to Adv of Smoking Blends,

МОСКВА, 16 сентября. Федеральная антимонопольная служба России проверяет информацию о рекламе курительных смесей в социальной сети Facebook, сообщил сегодня замглавы ФАС Андрей Кашеваров.

"Если мы найдем признаки нарушения закона о рекламе, то будем возбуждать дело. В случае если речь идет о наркотиках, то дополнительно направим материалы в Федеральную службу по контролю за оборотом наркотиков", - заявил он [ИТАР-ТАСС](#).

По сведениям издания, Facebook также может быть заблокирован в России, если менеджмент социальной сети не уберет рекламу курительных смесей.

Между тем, в Роскомнадзор такая информация пока не поступала. "В реестре запрещенной информации нет ссылок на рекламу курительных смесей в Фейсбуке", - сообщает ведомство в своем микроблоге в Twitter.

Earnings on the collapse of shares
GRAPE September 16, 2017

Hello, GRAPE.

Before describing the trace, scheme - I want to mention that neither I nor the administration of the channel calls in any way to do this and the article is only for acquaintance!

There are so many ways to make a profit in the investment market, one of them is a downgrade game. Such deals are called "Short", short trades on a certain time interval. Players who play on a slide are called "Bears". Today we will induce in the skin of a bear and make the theme that every child dreams about after watching the movie "The Wolf from Wall Street".

Let's consider the example of "Shorts" on promotions, which would be understandable about what it is. Suppose the balance on your brokerage account is 100,000 rubles. You received a signal to lower the shares of a certain company "X" and you decide to sell these shares at the current price (100 rubles per share) in the amount of 100,000 rubles (1,000 shares). After the transaction on your brokerage account appears:

Assets: 200,000 rubles (100,000 rubles + 1,000 shares * 100 rubles).
Liabilities: the obligation to return 5,000 shares of company "X".
After a while, the stock price fell to 90 rubles (10%), you buy 1,000 shares and return them to the company. As a result, you have:

Assets: 200,000 rubles + (1,000 shares * 100 rubles - 1,000 shares * 90 rubles) = 210,000 rubles.

On the fall of shares by 10%, you earned 10,000 rubles. In this example, the percentage for transferring a short position is not taken into account, and of course the broker commission.

Заработок на обвале акций

GRAPE • September 16, 2017

Привет, GRAPE.

Перед тем, как описать след, схему - хочу упомянуть, что ни я, ни администрация канала не призываем ни в коем случае этим заниматься и ставить только для ознакомления!

Есть очень много способов получения прибыли на рынке инвестиций, один из них игра на понижение. Такие сделки называются "Шорт", короткие сделки на определенном интервале времени. Игроки, которые играют на понижение называют "Медведи". Сегодня мы побудим в шкуру медведя и сделаем тему о которой мечтает каждый ребенок посмотрев фильм "Волк с Уолл-стрит".

Давайте рассмотрим пример "Шорта" на акциях, что бы было понятно о чем речь. Допустим остаток на вашем брокерском счете 100 000 рублей. Вам поступил сигнал о понижении акций определенной компании "X" и вы решили продать эти акции по текущей цене (100 рублей за акцию) на сумму 100 000 рублей (1000 акций). После совершения сделки на вашем брокерском счете появляются:

- Активы: 200 000 рублей (100 000 рублей + 1 000 акций * 100 рублей).
- Пассивы: обязательство вернуть 1 000 акций компании "X".

Через некоторое время курс акций понизился до 90 рублей (на 10%), вы покупаете 1000 акций и возвращаете их компании. В результате вы имеете:

- Активы: 200 000 рублей + (1000 акций * 100 рублей - 1 000 акций * 90 рублей) = 210 000 рублей.

На падении акций на 10%, вы заработали 10 000 рублей. В этом примере не учитывается процент за верное короткое позиционирование, ну и конечно же комиссия брокера.

When choosing a patient, we really liked one of the largest social networks Facebook, since we already built the development of events in my head, but about it later. How can you implement an artificial drop in the market? We already heard about the fake spam mailing, which failed the Apple stock, just heard about the fictional deaths in the media and much more. We could gather databases and organize mass spam from shells to any company, but this is an ancient century and a well-developed theme.

Preparing a bomb for Facebook

For the idea was taken the following! In the courtyard there was a year 2013 and the network of the banned sites was actively working, which included many conscientious projects. The situation with the US was strained, as the Ukrainian conflict has already begun to develop, if someone does not know. Our task was to:

1. Create a left site with child poro or drugs. We draw a high-quality lending page with contacts in which the project is responsible and the project itself must inspire confidence (that it really works).
2. We add this site to the list of banned through the form here eais.rkn.gov.ru, within 3 days it is made, maybe earlier. We did with shit, FSKN immediately brought this resource.
3. Now the most important ingredient! So, now we need to create an advertising company on FB, undergo a moderation and make a huge outlay of advertising on the muzzle with drugs. Next, we quickly send the information to the register of prohibited sites, FSKN and other structures. Resource banyat from the Russian Federation and we make a release in the media that the guys are chopped off from Russia. Look, the annual income from FB advertising in Russia was \$ 800,000,000 per year, the audience from Russia is huge. Here even a fool will understand that such a thing will not burn.

The story From 2013...

09/24/2013	48.505	49.66	48.16	48.45	136,274,400

Russia posts video game screenshot as 'proof' of US helping IS

14 November 2017 Europe

f t o e Share

Russia's Ministry of Defence has posted what it called "irrefutable proof" of the US aiding so-called Islamic State - but one of the images was actually taken from a video game.

Russian MoD to probe meme-triggering video game screenshot attached to Syria statement

Published 5m: 54 Nov, 2017 20:52

[Get short URL](#)

© Natalia Selivenstova / Sputnik

Russia's Defense Ministry says it has launched an inquiry into pictures mistakenly attached to its statement. One was a screenshot from a mobile game, leading to the internet exploding with memes.

"The Russian Ministry of Defense is investigating its civilian employee who mistakenly attached photos to a statement on the US-led coalition's interaction with the Islamic State militants in the area of Abu-Kamal," the military said in a statement.

How the Pentagon Spun Hurricane Maria

● U.S. officials inadvertently included a Bloomberg reporter on an internal email list. Here's a glimpse into their bid to put relief efforts in a positive light.

By Christopher Flavelle

More Freedom

Radical
Unthinkable

Less Freedom

Sept. 28: Eight days after Maria hit, coverage of the federal government's response is getting more negative.

The Government Message: Pentagon officials tell staff to emphasize "coverage of life-saving/life-sustaining operations" and for spokespeople to avoid language about awaiting instructions from FEMA, "as that goes against the teamwork top-line message."

Sept. 29: San Juan Mayor Carmen Yulín Cruz criticizes Washington's spin, calling Puerto Rico a "people-are-dying story."

The Government Message: FEMA talking points ignore Cruz, instructing its officials to say that "the federal government's full attention is on Hurricane Maria response."

Detection approaches

Detecting bot communities by account parameters

- Account lifetime
 - Avatars
 - Comments
 - Following
 - Followers
 - Isolated communities
 - Account lifecycle
 - Timing evaluation (race conditions) real staff starts slowly
 - Groups of users cluster into individual group and only talk to each other
- Also - generative user names oddness in profile data

Detecting bot communities by information distribution behavior

- Posting speed
- Active hours (how many of you work 24/7)
- Simultaneous activity on promoting topics
- (timing evaluation (race conditions) real staff starts slowly)
- Triggering points (how bots following botmaster)
- Spotting botmaster
- Communities

Detecting bot users

- Groups of users sharing the same content in random order
- Groups of users share similar properties in profile (or images)
- Timing evaluation (race conditions) real staff starts slowly
- Groups of users cluster into individual group and only talk to each other

Community Detection: Easy

```
import community
import networkx as nx
import matplotlib.pyplot as plt
import sys

#better with karate_graph() as defined in networkx example.
#erdos renyi don't have true community structure
G = nx.read_gml(sys.argv[1])

#first compute the best partition
partition = community.best_partition(G)

#drawing
size = float(len(set(partition.values())))
pos = nx.spring_layout(G)
count = 0.
for com in set(partition.values()) :
    count = count + 1.
    list_nodes = [nodes for nodes in partition.keys()
                  if partition[nodes] == com]

    print list_nodes
```

Exploring Twitter-Space with Graphs

- Slice (by keywords, and hour of event)
- Convert to Graph (GML)
- Sub-slices based on condition (i.e retweeting/quoting users from 2017 only)
- Identify isolated communities
- Validate retweet/quote only-accounts as bots

Why 24 hours before is important?

"The last minute swing" effect

Noelle-Neumann first began studying this spiral of silence in the 1960s to help understand an extreme shift of public sentiment in a 1965 German election (Noelle-Newman, 1993). She noted a “last minute swing” in a neck-and-neck election that seemed to shift almost overnight as public opinion polls began to reveal a slight majority opinion. Noelle-Neumann likens the last minute swing phenomenon in political elections as “running with the pack” or a “go-along” mentality. What drives that mentality, Noelle-Neumann explains, is fear of isolation. “The fear of isolation seems to be the force that sets the spiral of silence in motion”

Ne yaparsanız boş
Bu #VATAN bölünmeyecek,
Bu #BAYRAK inmeyecek,
Bu #EZAN susmayacak...!

Tek #BAYRAK.
Tek #VATAN.
Tek #MILLET.
Tek #DEVLET.
